

Keep any toggle open in Elementor

1. First, copy paste this Elementor toggle opened by default code:

```
<script>
window.addEventListener('load', function () {

let opened = [3];

setTimeout(function () {
let toggles = document.querySelectorAll('.openedByDefault .elementor-tab-title');
opened.forEach((i) => {
if (toggles[i - 1]) toggles[i - 1].click();
});
}, 300);
});
</script>
```

2. How many do you want to be opened by default?

In the code, you will see this line:

```
let opened = [1, 3, 5];
```

3. Add the CSS class:

```
openedByDefault
```
